

Meter Operator Agreement (MOP) Review

By understanding what you are paying for and comparing the options, a saving can be made on something you may never have heard of.

A MOP Agreement is a contract between you and the Meter Operator (MOP) covering rental and maintenance of any Half Hourly electricity meters installed in your buildings.

Whether you are charged directly or not, or have never heard of it, at some point you will be paying for this if you have a Half Hourly meter.

A MOP Agreement review will detail your current situation and what options you have for any future savings, all in an easy to understand report. As part of this review, we also look at how you are contracted for Data Collection and Aggregation.

You won't have to go through the headache of collating all your MOP data, going to all the MOPs for quotes, making sense of the data and then project managing the change. We will do it all for you.

The more meters you have, the greater the impact a MOP review may have on your finances. Let us organise your MOP Agreements for you.
