

## Price Projector

### Understand when it is best to renew your energy contracts, based on actual market price movements.

The Price Projector allows organisations to gain a better understanding of where the market is and how that affects them prior to contract renewal.

Without going into too much detail, the basic premise is to predict a 'best time to renew' by cross referencing an actual quote for your supply with real Market Knowhow. By using information that is relevant to you, combined with up-to-date market information, we are able to target our analysis, providing you with a report designed to assist you to make better decisions about your energy.

This will give you control over the forecasting of future energy costs and when contracting best suits your requirements and the market conditions.
