

# EV Charge Points

Version: 1 | © 2021 Indigo Swan

With increasingly volatile markets and more businesses looking to switch to greener energy suppliers, we have put together a series of trusted partnerships, allowing us to offer additional value to new and existing clients.

## Why the need for EV Points

With the government setting a target of stopping sales of new petrol and diesel cars by 2030, there is a strong focus on electric and hybrid vehicles in the current climate. Electric vehicles are becoming ever more popular as the infrastructure for EV points across the country grows. Technology is also playing its part with many electric vehicles now capable of ranging up to 200 miles on a full charge. Over the next few years, as we get closer to the 2030 deadline, the demand for EV points will become much greater.

## How it works & the benefits

Indigo Swan are committed to supporting customers on their carbon neutral journey. Installing EV charge points through Indigo Swan & Good Energy will help businesses with their corporate social responsibility, helping the UK to meet its ambitious Net Zero targets for 2050.

Indigo Swan are at the forefront of this technology helping existing and new clients with their renewables projects. Types of points vary from standard workplace charge points to pay as you go and rapid charge points.

Government schemes are also in place such as the WCS scheme, offering upto £350 per point towards the total installation cost.

## About Good Energy

Good Energy was founded in 1999 and was one of the UK's first 100% renewable electricity suppliers.

By signing up for EV charge points through Indigo Swan and Good Energy, customers will be provided with access to an App, which allows them to take pictures and videos of the site where the specific meter (s) are required, resulting in a simplified installation process.

You can find out more about our Sustainability Partnerships on our website.

## What next?

If you would like to find out more about EV Charging Points and explore what options are available to you, please get in touch by emailing us at [hello@indigoswan.co.uk](mailto:hello@indigoswan.co.uk)

We're Indigo Swan, energy enthusiasts. Our tailored service fuses relentless efficiencies with a colourful personality, and an unflinching commitment to finding a better way. We're proud to be exceptional. This, alongside our world class team, is what makes our service award-winning.
