

# Large Scale Power Purchase Agreements

Version: 1 | © 2021 Indigo Swan

With increasingly volatile markets and more businesses looking to switch to greener energy suppliers, we have put together a series of trusted partnerships, allowing us to offer additional value to new and existing clients.

## What are PPAs

A Power Purchase Agreement (PPA) is an upfront contractual agreement allowing you to sell your excess energy back to the grid, generating a further return on investment from renewable technologies.

## How it works & the benefits

Our Large Scale PPAs cater for any Solar generator over 500kW or any wind generator over 250kW. You will be able to access your account via an on line portal, allowing you to monitor and assess the revenue your PPA is making.

Indigo Swan are committed to supporting customers on their carbon neutral journey. Not only will having a large scale PPA through Indigo Swan & Zeigo help you to reduce your overall energy costs, it will also help businesses with their corporate social responsibility, helping the UK to meet its ambitious Net Zero targets for 2050.

By entering into a PPA with Indigo Swan, you can have reassurance that you're in good hands. With our dedicated team, we can help secure the best contract for your business using our market insights and partner relations.

## About Zeigo

Zeigo is a digital PPA platform providing generators and developers with a dual route to market via Corporate and Utility off-takers. Using the latest technology, Zeigo helps secure best terms in the market simply and efficiently.

We are working with Zeigo to offer Utility style PPAs and will offer competitive rates for energy sold back to the grid.

You can find out more about our Sustainability Partnerships on our website.

## What next?

If you would like to find out more about Large Scale Power Purchase Agreements and explore what options are available to you, please get in touch by emailing us at [hello@indigoswan.co.uk](mailto:hello@indigoswan.co.uk)
